## HEAR OGDEN PLEA FOR LOWER RATES

Testimony Presented and the Case Adjudged Until Saturday in Salt Lake.

(Special to The Herald-Republic.)  
Ogden, Oct. 28.—One of the most important facts brought out at the hearing of the alleged discrimination of the Oregon Short Line Railroad company against Ogden and in favor of Salt Lake City, before Interstate Commerce Commissioner C. A. Prouty, in this city today, was the testimony of D. E. Burley, general passenger agent of the Oregon Short Line Railroad, that during the months of September and October, at the Four-State fair, which was held in Ogden, and the Mormon church general conference and state fair, held in Salt Lake City, the railroad company sold more than half as many tickets this year to Ogden as it did to Salt Lake City.

In support of the testimony of Mr. Burley the following was introduced: From common territory to both points—number of tickets, 1908 1909  
To Ogden and return for the Four-State fair, 1,029 3,252  
To Salt Lake City for conference and state fair, 5,762 6,138  
At the conclusion of the taking of testimony by Commissioner Prouty, an adjournment was taken until next Saturday morning at Salt Lake, when four members of the interstate commerce commission will hear the arguments of the attorneys for both sides.

The hearing will be held at 10 o'clock this morning in the council chamber at the city hall. Present were Commissioner C. A. Prouty, H. H. Henderson, and A. R. Heywood for the complainants; P. L. Williams of Salt Lake City and P. C. Dillard of Chicago, representing the defendants.

Among those present were President William Glasman of the Four-State association, United States Marshal James Anderson, R. W. Phillips, stenographer of the commission; Prouty, Grant, Smith and Stohl of the Davis, Cacho and Box Elder stakes of the Mormon church; D. E. Burley and D. S. Spencer, the general and assistant general passenger agents of the Oregon Short Line; George H. Smith, assistant short line of the railroad; A. E. Mosley and P. H. Cowley, general passenger agents respectively of the Harriman lines; C. R. Hollingsworth, local counsel of the Harriman lines; L. ## QUESTION IS STRADDLED

Auditing Committee of Waterworks Records Shows That William Glasman Was Correct.

(Special to The Herald-Republic.)  
Ogden, Oct. 28.—Mayor Brewer's water committee straddles the water question. It reports the water report was true and correct and there was \$2,894.34 cash on hand, and then says that the auditor's report of the same report shows an overdraft of \$20.86, and also proves that William Glasman was right when he said that the warrant for \$10.125 was drawn by the auditor and approved by the city council and mayor.

It says the waterworks made a net earning of \$2,894.34 by the city and \$4,333.12 uncollected water rent—both as an earnings—and that all of the earnings with other money had been expended on the system.

That is what Mr. Glasman said was done. He said there was not a dollar's profit over and above the expenses.

## "MOTIVE POWER" THEME FOR MUCH DISCUSSION

Members of Manufacturers' Association Enjoy Three Interesting Addresses at Meeting.

"Motive Power in Factories" was the general subject discussed at the meeting of the Manufacturers' association of Utah, held last night at the chamber of commerce. The members listened to three papers on various phases of the subject, one on "Steam," by Professor E. H. Beckstrand, of the University of Utah, the second on "Electricity," by A. J. McMullen, of the Utah Light & Railway company, and the third on "Gas," by E. C. Clark, superintendent of the Utah Gas & Coke company.

Professor Beckstrand, who was the first to speak, said the use of heat generated from water was known many centuries ago but it was only in the seventeenth century that the experiments began which led to the steam engine. He mentioned the fact that four-fifths of the power of the world of today is produced by the steam engine.

Mr. Clark spoke of the growth of the electric power industry in the last few years, and of the use of electric power in factories and in the use of electric power in the various modes of applying the power.

Mr. McMullen spoke of the growth of the gas industry, and of the use of gas in the production of many appliances in which gas is used and discussed gas as a power producer, telling of the improvements brought about in gas engines.
